## **Troubleshooting:**

## **Disable Firewall**

On a Mac:

- . Open up System Preferences, which is the icon in your dock with the gears (usually near the far right).
- . Click on "Security", which is in the top line of icons.
- . Go to the Firewall tab.
- . Click the small padlock icon in the bottom left-hand corner. Enter your password when prompted.
- . Hit the Stop button to turn the firewall off. If you want to turn it back on later, you can come right back to the same place and hit the Start button.
